

Batch #81009 Summary

Commodity:	Hay	Species:	Cereal
Grade:	Utility	Sub-Species:	Oaten
Inspector:	Cameron Angel	Location:	Tarawera, QLD
Inspection Date:	19/09/2025	Storage:	Stacked Outside

Feed Test Results

Moisture:	14.78	Dry Matter:	85.22
ME (Mj/kg DM):	9.59	CP:	14.17
Sugar (WSC):	12.72	ADF:	32.32
aNDF:	47.17	RFV:	126
RFQ:	162.48		

Inspector Notes

A very green line of Oaten Hay it was bailed before the rain so it wasn't quite cured. We tested it the day of bailing so moistures were unsettled. We expect them to go up but it's very good Feed in the condition it is but we don't feel that this would be a stable product. It may start to have some heating problems which may start to affect quality and bale integrity.

Visual Inspection

Year of Harvest:	2025	Month of Harvest:	Sep
Visual Colour %:	80%	Leaf Retention:	Very Leafy and Excellent
