Inspector Notes

This is a nice line of barley straw that got rained on in the windrow. It was raked a few times and then baled. Contractor struggled to get all the moisture out of it, so it presents with some clumps with high moisture that is not really high but over 18%. When they raked it, they picked up a little bit of Corn Stubble and a tiny little bit of dirt in some sections, but the straw is quite clean and presents very well.
